After adjusting the data for seasonality, decreases in employment were recorded in all major sectors except services, government, and wholesale and retail trade. Since March 1990, total nonagricultural wage and salary employment has increased by 45,600, a gain of 0.4 percent over the year. During February, average weekly earnings and average weekly hours worked in manufacturing remained relatively stable at \$470 and 40.2, respectively.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

FOOTNOTES TO TABLES

- A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.
- B. Does not include force-account and government construction workers.
- C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.
- D. Includes all employees at the city and county of San Francisco.
- E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings.
